The Charity Hospital of Louisiana, was founded in the year 1786 by Don Andres Almonaster y Roxas.

To whose generous endowment, the munificence of the Legislature of this State, and the liberality of the State of Pennsylvania, the community is indebted for the means of erecting this edifice, built in the year MDCCCXXXII

His Excellency A. B. Roman, being Governor and Ex-Officio President of the Institution.

To record which and inscribe hereon the names and contributions of its distinguished benefactors,

THIS TABLET HAS BEEN ERECTED.

Wm. H. Letchford, 1,000 00

Mrs. Cora Livingston Barton, who died some years ago, left to the Hospital the sum of six thousand dollars, to be paid out of a fund to be derived from the sale of the property No. 751 Broadway, New York, upon the death of Julia Barton Hunt and the Hon. Carleton Hunt, who, in the meantime, have the usufruct of said property.

Under the will of Jean Francis Schweitzler, who died in Paris, France, July 2, 1891, the sum of $20,000 has been bequeathed to the Hospital, the usufruct of said legacy to be enjoyed by Mrs. Wid. Jean Schweitzler, the testator's stepmother, during her lifetime. At her death the principal is to be paid to the Hospital.

JNO. G. DEVEREUX.

(Extracts from Minutes of Board of Administrators, Regular Meeting, Oct. 5th, 1891.)

The Vice President then presented and had read to the Board the following preamble and resolutions on the death of Jno. G. Devereux, which on motion were unanimously adopted as follows:

The Board of Administrators of the Charity Hospital, receive with sincere regret the intelligence of the sudden demise on yesterday, the 4th October inst., at Helmetta, New Jersey, of MR. JNO. G. DEVEREUX one of their members.

His association with us in the management of the institution, throughout the administration of His Excellency Governor Francis T. Nicholls, marked him as an invaluable auxiliary in our good work.

His clear judgment, large experience as a financier, his scrupulous exactness in all the essential requirements of this important trust, rendered him of material aid to its successful management.

Always at its service, he never tired in devotion to its interest, ever proving himself an enlightened, conscientious coadjustor in the responsible position of administrator; therefore be it;

Resolved, that the death of JNO. G. DEVEREUX, terminates an invaluable service to this institution, a service freely bestowed and with marked ability, and which rendered him a valuable public servant in behalf of the State's Great Charity.

Resolved, that this preamble and these resolutions be inscribed upon the minutes of the Board, and a duly attested copy under seal be transmitted to his family.

Resolved, that in estimation of his worth, and of its appreciation by the Board, the members will attend his obsequies in a body.

A True Extract from the Minutes,

EDWIN MARKS,
Secretary.
ANNUAL REPORT

OF THE

BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL,

For the Year ending December 31, 1891.

CHARITY HOSPITAL,

STATE OF LOUISIANA, FEBRUARY 1, 1892.

To His Excellency, Francis T. Nicholls, Governor of Louisiana, Ex-Officio President of the Board of Administrators of the Charity Hospital:

Your Excellency—In accordance with custom, it again becomes our pleasing duty to report to you the workings of the Hospital during the last year.

You have presented herewith the reports of the House Surgeon, House Committee, Secretary and Treasurer, Finance Committee and Clerk, which will give succinctly the present condition of the Hospital.

We are thankful to say that there was no epidemic influence in the city during the year. The number of patients remaining at the last annual report was 642. The number admitted in 1891 was 6706, making the total number of inmates treated in 1891, 7348, an increase over the number in 1890 of 568.

The number of deaths was 1028, making a total mortality of a little less than fourteen per cent.

There were 1271 cases of minor surgery treated in the amphitheater, and then allowed to return home. In the dental department 1725 patients were attended. Then, to summarize, the total number of inmates was 7348; number of amphitheater cases 1271; number of cases of dentistry 1725; number of patients treated in the out-door clinic 13,193; making a grand total of 23,537.
Many substantial improvements and additions have been made in various departments, as detailed in the House Committee's report, but the most essential are the additions to the offices on either side of the entrance, and the two outdoor clinic buildings, one for Women and Children, the other for Men and Boys. They are two-story brick buildings, with sanitary roof, so constructed that an additional story may be added, should the exigencies of the Hospital ever require it. The exterior is finished with Portland cement; the interior lined with Acme cement. The floors are laid with yellow pine and all openings trimmed with cypress, with hard oil finish. The buildings are heated with steam throughout, and every consultation room is supplied with hot and cold water, all apparatus thus required being connected with the general pipe system of the Hospital. The sewer attachments are all connected with the central sewer plant of the Hospital. In the construction of these buildings due regard has been given to the requirements of domestic hygiene in the matter of light and ventilation and with respect to the position of the new buildings on the Hospital premises.

The new buildings are situated on Tulane avenue; the Clinic for Women and children on the corner of Locust street, that for Men and Boys on the corner of Howard street.

These buildings have been constructed upon plans and specifications designed to meet all the requirements of the outdoor service, and furnish accommodations for the outdoor treatment of men, women and children—white and colored.

The consultation rooms are so appointed as to give medical relief to all classes of patients suffering from general and special diseases.

The following are the clinical divisions:

General Medical Diseases—White and Colored.

Venereal and Skin Diseases—White and Colored.
Diseases of Children—White and Colored
Ear, Eye, Nose and Throat Diseases, Dentistry—White and Colored.

These clinic buildings will be fitted with all modern facilities for the treatment of general and special diseases.

The furniture will be made, according to plans and specifications, of oak or ash, and will be of the best workmanship for modern Hospital uses.

The outdoor clinics constitute a part of the medical department of the Hospital, and the various clinical divisions will be under the charge of the members of the outdoor visiting staff. The indoor visiting staff will be assigned, as heretofore, to the various wards in the main building.

All these provisions obviate the disadvantages which have always attended the treatment of patients, indoor and outdoor, in the wards of the Hospital, and establish the two departments of the Hospital in separate buildings, a system of medical management which has been urgently needed for many years.

In reviewing the efforts to accomplish these results, our hearts are saddened by the loss, by death, of one of our most active, zealous and efficient members, Major J. D. Devereux.

He looked forward with great pride and satisfaction to the completion of the projects in hand for the good of the Hospital and the aid and amelioration of the outside worthy poor, and his very heart and soul were in them. He was a man of rare purity and justice and of great financial ability, and so earnest and identified with the well-being of this institution that his loss is greatly felt and almost irreparable.

The previous and present Board, in forecasting changes greatly desired, fondly looked forward to the completion of these buildings as the ultimate consummation of a vast system of improvements.

For many years the House Surgeon, in his annual reports, reiterated their necessity at the earliest moment practicable, but
as much as they were needed, there were many things even more urgent, which had to be accomplished first; and it is with considerable pardonable pride and gratification that we announce we now have them, and have them paid for.

Great economy and the best financial ability, thanks to our able and assiduous Finance Committee, and the par value of our State Warrants, for the last few years, enabled the Board to husband its resources and thus complete these long coveted improvements. We congratulate the Hospital, its well wishers and the indigent, on their completion.

In conclusion, we heartily give due praise and thanks to all of our coadjutors; first to the good Sisters in their constant, gentle and most efficient ministrations; to the House Surgeon and his Assistant for their always courteous, efficient and zealous aid and direction; the Secretary and Treasurer, the Engineer, the Clerk, the Pathologist, the Apothecary, the Dentist, and all the personnel of the Hospital for their faithful work and invaluable services. The Ambulance Corps have done their work well and their services are gratefully acknowledged.

With assurances of high esteem, I remain, your obedient servant,

C. J. BICKHAM,
Vice-President.
REPORT OF THE SECRETARY AND TREASURER.

CHARITY HOSPITAL,  
STATE OF LOUISIANA,  
NEW ORLEANS, January 1, 1892.

To the Vice-President and Board of Administrators:

Gentlemen—In presenting the usual tables embracing this report, I find it necessary to add the following:

LEGACIES.

In addition to the donation of the heirs of Wm. H. Letchford, deceased, of $1,000, elsewhere acknowledged, the Hospital is the promised recipient of the sum of $20,000 under the will of Jean Francis Schweitzer, who died in Paris, France, July 2, 1891. Under the terms of the testament, which has been duly probated in this city, Mrs. Widow Jean Schweitzer, the testator's stepmother, is to enjoy its usufruct during her life, and at her death the amount is to be paid to the Hospital.

LEASES.

During the past year the following leases of cotton press property expired and have been renewed: Sheds of Union Cotton Press have been leased to Mr. H. W. Fairchild, from September 1, 1891, for twelve months, at a rental of $118.49 per month, or a total of $1,421.88, for the year ending September 1, 1892.

Four certain lots in Shippers' Cotton Press have been leased to Col. Sam'l Boyd, the previous lessee, from January 1, 1892, for twelve months, at a rental of $187.50 per quarter, or a total of $750, for the year ending December 31, 1892.

Respectfully submitted,

EDWIN MARKS,  
SECRETARY AND TREASURER.
REPORT OF THE HOUSE COMMITTEE.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 1st, 1892.

To the Vice-President and Board of Administrators:

Gentlemen—Your House Committee beg leave to present the following summary of improvements, etc., made to the Hospital during the past year:

There have been purchased and placed in use the following:

A new improved, "Troy hydraulic washing machine," with sufficient capacity for the requirements of this institution.

A new soup kettle for the kitchen to replace old one, worn out after use of fourteen years.

A new "feed water heater" for steam boilers.

A "hot water heater," for the Female Department, to replace old one.

All of the above mentioned appliances and apparatus have proven satisfactory.

There have been purchased 150 feet of first-class canvas hose for use in emergency of fire, replacing a like quantity of old hose rotted from age.

The ambulances have been repaired during the year and are now in first-class order.

The completion of the two outdoor clinic buildings will add greatly to the comfort and well being of both the indoor and outdoor patients.

A much needed and important work has been the extension of the Surgeons' offices and bedrooms in the buildings fronting the main Hospital building. The additions to the offices proper consist
of annexes, properly lighted and ventilated, with access from main offices, and altogether affording the Surgeon's additional facilities, comfort and privacy.

The improvements on the second floor, contiguous to the bedrooms, afford the necessary bathrooms, automatic water closets, etc., much enhancing the personal comfort of these officers, as well as that of the Resident Students. The cost of this work approximates to $2000, as per statements.

The hospital buildings have been painted, kalsomined, etc., where needed, and proper renovation introduced to cover "ordinary wear and tear."

The supplies of meat, bread, milk, fuel and ice, for which contracts were entered into, have in the main been regularly and satisfactorily filled and contractors held to strict compliance.

The Rules and Regulations for the government of the institution have been ably and carefully revised under the direction of House Surgeon, with such aid as the Committee could render. They will be prominently hung in the Hospital buildings.

In conclusion, your Committee beg to express their high appreciation of the admirable services of the general staff and officers of the Hospital; they have been fully up to the requirements of the standard established.

Especially would they note the intelligent and untiring work of the Chief Engineer, Mr. John Ponder, whose capable direction has much lightened the labors of your Committee. Our report would be incomplete did we fail to mention our sense of obligation to the noble Sisters of Charity for their devotion to their self-assumed, onerous duties.

Respectfully submitted,

WM. G. VINCENT,
J. H. KELLER,
Committee.
REPORT OF THE CLINIC BUILDING COMMITTEE:

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 1, 1892.

To the Vice President and Board of Administrators:

Your Committee are pleased to report the virtual completion of the buildings designed for the outdoor service of the Hospital, which has been accepted from the builders after approval of the architect, and await only their proper furnishing and equipment to enable the Board to inaugurate the service. It will not be out of place for your Committee to allude briefly to the necessity that brought about the erection of the buildings and also to essay their description.

For years it has been apparent that the main service of the Hospital has been much embarrassed by the large daily influx of outdoor patients in the wards occupied by the sick, the effect being to discomfort and annoy the latter. The service itself is a necessity for the destitute sick of the city and adjacent country, and has heretofore afforded much general relief. It includes the special Clinics of the Eye, Ear, Nose and Throat, as well as that of Dentistry.

Its necessity being established, the problem presented to your Board was, how to continue the service and at the same time to properly and judiciously separate it, the want of surplus means being the chief difficulty. Your Board hailed with satisfaction our improved financial condition, brought about by the par redemption of the warrants issued for the maintenance of the Hospital, and a carefully ordered economy, which have at length enabled us to accomplish the result herewith detailed.
Their construction being agreed upon, your Board requested the House Surgeon, Dr. Albert B. Miles, to design a plan for the buildings, with a view to the proper accommodation and arrangement of the various services and the carrying out of the modern sanitary requirements of ventilation, etc. After careful examination of other methods and plans, your Board accepted the House Surgeon's designs and thereafter employed Mr. Thomas W. Carter, as architect, to supervise the erection of the buildings. Mr. Carter elaborated the designs and prepared plans and specifications, technically carrying them out. After due advertisement, according to law, of the proposed erection of the two buildings, in consonance with the plans and specifications, the sealed proposals therefor were opened and the contracts were severally awarded to Messrs. Muir & Fromherz, builders, as the lowest and most solvent bidders, and who have in due course fulfilled the same satisfactorily, and been paid. The buildings have been constructed with the view of adding an additional or third story, should it, in the future, be deemed advisable to so do, the foundations being laid sufficiently deep and strong to admit of it. The contract price of the Female Clinic Building was $13,345.00, and that of the Male Clinic Building was $14,350.00, the figures being slightly varied as the work progressed. Additional sums were expended in defrayment of necessary work outside of the builders' contracts and which will appear when the final payments are made.

In furtherance of proper sanitary requirements, your Board had the clinic buildings, together with the surgeon's office buildings, connected with the general sewer system of the Hospital, and have generally adopted the best methods for obtaining proper light and ventilation. Additionally, the patent Schillinger pavement has been laid around both buildings, with proper drainage facilities. The brick wall heretofore in front of the Hospital has been entirely removed and the gaps between the buildings, lined upon Tulane Avenue, filled with a neatly built iron fence upon a brick foundation, which, taken in connection with the iron fold-
ing gates enclosing the granite steps of the clinic buildings, lends a uniform and symmetrical appearance to the front.

All the work, including the clinic buildings proper, has been carefully and daily supervised by Chief Engineer Ponder, and is first-class in every respect. As soon as the buildings are furnished and equipped, and finally turned over to the State, your Committee will have the Treasurer of the Hospital prepare for publication an exact statement of the expenditures incident to their erection.

Before closing this report, your committee desire to express their profound regret at the death of their lamented colleague, the late Jno. G. Devereux. His excellent judgment, zeal and devotion to his duties materially aided our work and contributed to its success.

In conclusion, your Committee append a description of the buildings prepared by Mr. Thomas W. Carter, Architect, and to which we invite attention.

Respectfully submitted,

C. J. BICKHAM, EX-OFFICIO.
WM. G. VINCENT, CHAIRMAN,
J. H. KELLER,
A. B. MILES.

DESCRIPTION OF THE OUTDOOR CLINICS BUILDINGS.

There are two clinic buildings, alike in architectural design and finish, each having a frontage of fifty-six feet on Tulane Avenue, with a depth of sixty-two feet on the cross streets. The Clinic for Women and Children is situated near the corner of Locust street, that for Men and Boys on the corner of Howard street.

They are designed after the Venetian style of architecture and finished alike after a uniform plan of construction. The principal fronts on Tulane Avenue are each divided into three compartments, resting on a deep splayed basement, the center having a
handsome arched porch resting on side pilasters, with a flight of granite steps ascending to the entrance hall, flanked with bold rustic coins. The side wings and all corners on the first story are flanked with the same rustic work and with plaster ante on the second story, which latter rest on a massive belting course, and are crowned above with a handsome solid moulded entablature and blocking course. In the center of each front is a pediment, with the year of erection, 1891, in raised figures on the panels. The windows are of large and proportionate size, surrounded with neat moulded architraves on each floor, and in addition, on the first story, they are keyed to the belting course. The buildings are arranged with a central hall on each story, flanked on either side with the various Reception and Consultation Rooms: the whole fitted up with all the necessary plumbing appliances for supplying hot and cold water in each Consultation Room, and with heating and ventilating apparatus required in modern hospital construction.

The upper and lower floors communicate with each other by wide and handsome stairways, having an easy rise to suit both aged and young. The walls have been plastered with smooth finished Acme cement, left in its natural state.

The woodwork internally has been finished with Berry’s hard oil finish, showing the natural grain of the wood. Great care has been taken to admit a sufficiency of light and air to each room by windows and wire screens specially devised for the purpose.

In each hall will be a mural tablet of fine statuary bronze, commemorating the erection during the administration of Governor Francis T. Nicholls.

The grounds have been laid off into lawns, with Schillinger paved walks, and the entire frontage on Tulane Avenue has been enclosed with iron fencing, of ornate and durable workmanship, resting on a basement of brickwork, cemented to imitate stone.

Respectfully submitted.

THOMAS W. CARTER,
ARCHITECT.
REPORT OF THE FINANCE COMMITTEE.

CHARITY HOSPITAL, 
STATE OF LOUISIANA, 
NEW ORLEANS, FEBRUARY 1, 1892.

To the Vice-President and Board of Administrators:

Gentlemen—Your Finance Committee would respectfully report that the income of the Hospital for the past year has promptly reached it as due. The prompt par payment of the State’s warrants and the ordinary revenues of the Hospital, coupled with proper economy in expenditures, have enabled the transfer of sufficient funds, added to the surplus of 1890, to defray the cost of improvements elsewhere noted, and leave a cash balance at the opening of the present year, as reported by the Treasurer.

Respectfully submitted,

G. W. SENTELL, 
HUGH McMANUS, 
GEO. SEEMAN, 
Finance Committee.

Chinese mission, beautiful head-rest of Chinese silk.

Joseph A. Walker, basket of champagne.

Mrs. Capt. Leathers, turkey and basket of fruit.

J. Dufau, milkman, load of cabbage and turkey.

Contribution box in front hall, $29.05.
To the Board of Administrators:

Gentlemen—We have the honor to transmit herewith the annual records of the medical department, and report generally on the medical management of the Hospital during the year 1891.

At the last annual report, 642 patients remained under treatment; during the year just closed 6706 new patients were admitted, making a total of 7348 inmates treated: white 5174, colored 2174; males 5547, females 1801.

The admissions are 623 in excess of the previous year, owing largely to the continued prevalence of the Influenza and the increased number of respiratory diseases which it causes.

The admissions comprise 4690 white and 2016 colored; male 5122; female 1584; children under 10 years of age, 201 (white 188, colored 13). In the Maternity Department 148 children were born.

Of the admissions 6509 were free patients, 197 pay patients.

Of the 7348 inmates treated, 5634 were discharged; cured 2699, or 47 per cent.; improved 2027, or about 36 per cent.; unchanged 908, or about 17 per cent.

There were 1028 deaths, a total mortality of nearly 14 per cent. The annual death rate is, as usual, increased by the fatality of the aged, of coroner's cases, and of the number of patients admitted in a moribund condition.

The Outdoor Department gave relief to 13,193 visiting patients. In addition to this number, 1271 cases of accidental sur-
gery were attended in the Amphitheatre, and 1725 in the Dental Department. The total number of outdoor patients is 16,189.

The medical work of the year, stated briefly, comprises the indoor treatment of 7348 patients; the outside relief of 16,189, all told, amounting to 23,537 patients.

The amount of work necessary to the care of such a large number of patients must impress any thoughtful mind. Those who have shared in this work deserve our grateful acknowledgments. The Assistant House Surgeon, Dr. J. D. Bloom, well deserves your commendation.

The Sisters of Charity, with unaltering faithfulness in the discharge of every duty, have maintained the domestic departments in the same economical, yet efficient manner, as has always merited only words of approval and grateful recognition.

The completion of the outdoor clinic buildings, as detailed in the report of your Special Committee, is an event of great importance in the work of the year. The necessity of separating the indoor and the outdoor service has been imperative for many years. The new clinic buildings provide for the treatment of all the general and special diseases, occurring among men, women and children, white and colored. The same facilities are offered for the treatment of white and colored patients, but in some of the clinics, where deemed advisable, the races are treated separately. Under the Rules and Regulations of the Outdoor Clinics, adopted by the Board, the service will surely work efficiently and harmoniously. We will be enabled to organize more thoroughly the system of outdoor medical relief, and better restrict the charity to those who deserve it. The outdoor clinics are established for the benefit of the poor, and it must be understood that those who come here for relief can not afford medical attendance elsewhere. There should be no conflict between this work of medical relief for the benefit of the poor and the avocation of the physicians of New Orleans. In the medical management of these clinics we bespeak their favor and their co-operation.
The Ambulance Service has been well maintained and we are gratified to report its thorough efficiency. All connected with the corps have done their duty, and the Ambulance Surgeons merit words of approval and encouragement.

The calls answered during the year number 1348, one less than last year. Many calls are needless, an evil without remedy, unless the telephone company co-operate with us in urging that only responsible persons shall be allowed to use the instruments for summoning an ambulance.

Herewith are presented, with our approval, all the annual reports of the special branches of the medical department.

We beg, in conclusion, to report favorably on the general condition of the Hospital. All the more important works of improvement, recommended in our annual reports of the past ten years, have now been completed. the construction of the outdoor clinic buildings being the one of paramount importance. In the exigencies of the coming year, any improvement or work of repair necessary, will, from time to time, as heretofore, be recommended in the regular monthly report.

Respectfully submitted,

A. B. MILES,

House Surgeon.

</tbody>
</table>

These are mostly cases of minor surgery.

After the operation or surgical dressing, most of these patients leave the hospital and return, if necessary, as patients in the Outdoor Department.

SUMMARY OF OBSTETRIC CASES, 1891.

There were 143 cases of Obstetrics.

White ..................................... 87

Colored .................................... 56

Multipare .................................. 80

Primipare .................................. 73

There were five cases of twins, making the total number of children-born 148.

Breech ..................................... 3

Face ....................................... 1

Footling ................................... 2

MANNER OF DELIVERY.

Naturally ................................... 132

By Forceps .................................. 11

By Manual Traction ........................ 5
Mortality of Mothers.

Of the 143 cases 3 mothers died, making a mortality of a little more than 2 per cent.

Causes of Death.

Puerperal Eclampsia .................................................. 1
Puerperal Septicæmia .................................................. 2

Complications of Confinement.

Delivered, naturally, without accident ............................... 87
Cord around Neck ...................................................... 12
Prolapse of Cord ......................................................... 4
Arm with Head ............................................................ 4
Born with Caul .......................................................... 1
Inertia of Uterus .......................................................... 10
Adherent Placenta ...................................................... 7
Placenta Prævia ........................................................... 2
Laceration of Perineum ................................................ 20
Knot in Cord .............................................................. 1

The number of children born were 148.

Male ................................................................. 83  Living .................................................. 127
Female ............................................................. 65  Still-born ............................................ 21

Most of the still-born children were delivered before the seventh month.
