

THE
CHARITY HOSPITAL

OF LOUISIANA

WAS FOUNDED IN THE YEAR 1786

BY

DON ANDRES ALMONASTER Y ROJAS,

To whose generous endowment, the munificence of the
LEGISLATURE OF THIS STATE
and the liberality of the State of Pennsylvania, the community is indebted
for the means of erecting this edifice, built in the year

1832

His Excellency A. B. Roman being Governor and Ex-Officio
President of the Institution.

To record which and inscribe hereon the names and contributions of its
distinguished benefactors

THIS TABLET HAS BEEN ERECTED

Etienne Bore	\$ 1,000.00	Mrs. D. A. Milliken.....	\$200,000.00

Form of Gift or Bequest

I give (or bequeath) to the CHARITY HOSPITAL, New Orleans, an institution established under the laws of the State of Louisiana, the sum of

_____ Dollars,
to establish an "ENDOWMENT FUND".

It is agreed that this fund is to be judiciously invested and the revenue therefrom applied solely to charitable work in said institution.

Adopted July 19th, 1926.

The Board of Administrators of the Charity Hospital of Louisiana, New Orleans, does hereby agree and bind itself and its successors in office as a condition precedent to the receipt of donations or bequests to the "Endowment Fund", to put aside unimpaired in perpetuity and invest said funds, and keep same perpetually invested in high grade bonds or other interest bearing securities, and the interest earned thereon to be dedicated and used exclusively for the furtherance of its charitable work.

Furthermore, that any donation or bequest of Five Hundred Dollars (\$500.00) or more, the donor's name be inscribed upon the tablet in the Main Building and a plate bearing the Donor's name be placed on a bed in a designated ward.

CHAS. J. RIVET, VICE-PRESIDENT BOARD OF ADMINISTRATORS

ANNUAL REPORT OF THE VICE-PRESIDENT

His Excellency, Richard W. Leche,
Governor of the State of Louisiana and
Ex-Officio President of the
Board of Administrators of the
Charity Hospital of Louisiana at
New Orleans, Louisiana.

This portion of our annual report for the year ending June 30, 1937, is confined to a chronological review of the administrative activities of the Board, deemed important or of general interest. Reports of the Director, of the Treasurer, and of Department heads, cover in detail the general operations of the Hospital.

On July 20, 1936, on the recommendation of Dr. George S. Bel, then Vice-President of the Board, it authorized its Medical Committee and Superintendent to confer with representatives of the medical and dental schools operating in the hospital, for the purpose of creating units comprising various services assigned directly to the schools, similar to the system used at Bellevue Hospital in New York, and in several of the larger hospitals of the country.

On August 24, 1936, pursuant to appointments made by your Excellency under Act 125 of 1924, Messrs. B. C. Casanas, John L. Diassellis and Dr. W. D. Phillips, assumed membership on the Board.

On the same day the resignation of Dr. Arthur Vidrine, as Superintendent, was accepted. This office was abolished and that of Director created, to which Dr. George S. Bel was unanimously elected. Dr. Roy W. Wright was elected Assistant Director, and Dr. Rigney D'Aunoy was designated as Executive Advisor.

The election of Dr. Bel as the first Director of the Charity Hospital created a vacancy in the office of Vice-President which was filled by the election of Charles J. Rivet.

The Legislature of 1936 enacted the following laws affecting the Charity Hospital of Louisiana at New Orleans: Acts Nos. 5, 72, 88, and 108.

On September 21, 1936, the Board accepted the offer of the Federal Emergency Administration of Public Works to aid, by way of a grant of \$3,600,000.00, in financing the construction, additions and alterations to various new hospital buildings, including necessary equipment, and your Excellency, as President of the Board, was authorized to enter into the necessary contract with the Federal Agency.

Messrs. Weiss, Dreyfous & Seiferth, who had worked long and effectively on preliminary plans, were designated as Architects for the project. Dr. D'Aunoy, the Board's Executive Advisor, was appointed the Board's representative to cooperate with the Architects and determine all technical matters regarding the design, erection, and equipment, of the new hospital.

In accordance with the agreement entered into with the Federal Emergency Administration of Public Works, work on the new project began prior to November 15, 1936, with the building of the Ambulance House and Laundry.

The problem of demolishing old buildings and caring for patients during the interim was planned, and the Bienville Hotel Building at Lee Circle was rented for use as a dormitory for nurses. The Pythian Temple, corner Gravier and Saratoga Streets, was rented for use for colored patients. The building at Tulane Avenue corner of Liberty, owned by the Administrators of the Tulane Educational Fund, was by them graciously loaned for use for the out-patient department. The building (upper floors) No. 253 South Claiborne Avenue was rented for use of the Social Service Department.

The Works Progress Administration, through the co-operation of Mr. James H. Crutcher, State Director, undertook the demolition of the old buildings, including the main hospital building, which had been erected in 1832.

The razing of the buildings was completed during February, 1937. The materials and equipment from the old buildings were salvaged, and stored away for possible future use.

On October 6, 1936, the Board authorized the purchase of property in squares adjacent to the old hospital site, which were deemed necessary for the new project.

On October 19, 1936, the Board authorized the issuance and sale, on sealed proposals, of bonds in the amount of \$4,400,000.00, to be designated as "CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS SERIAL BONDS 1936", to be dated October 15, 1936, and to bear such rate of interest as the Board might determine at the time of the sale thereof, said interest to be payable semi-annually on the fifteenth day of April and of October, in each year.

On November 9, 1936, the Board received sealed proposals for the purchase of its bonds, pursuant to public advertisement, and accepted the bid of a syndicate represented by Weil & Company, Inc., for the price of \$4,402,156.00, with interest rates as follows: On \$341,000.00, maturing from 1938 through 1941, inclusive, 4-1/2% per annum; on \$1,925,000.00, maturing from 1942 through 1956, inclusive, 4% per annum; on \$2,134,000.00, maturing from 1957 through 1966, inclusive, 3-1/2% per annum.

On November 10, 1936, pursuant to public advertisement, the Board received sealed proposals for the foundation work for the ambulance house and laundry building, and awarded the contract to Lionel F. Favret, the lowest bidder, for \$39,596.00, with the approval of the Public Works Administration.

On January 5, 1937 pursuant to public advertisement, the Board received sealed proposals for the erection of the Ambulance House and Laundry Building, and awarded the contract to Caldwell Bros. & Hart, the lowest bidders, for \$216,497.13, with the approval of the Public Works Administration.

On January 18, 1937, the Board authorized the Faculty of the School of Nursing to seek affiliation with Louisiana State University, and to join the Association of Collegiate Schools of Nursing. This entailed a reorganization of the curriculum so as to include: (1) The three-year basic pro-

fessional program leading to a Diploma in Nursing; (2) The five-year basic professional and university program leading to a Diploma and the Degree of Bachelor of Science in Nursing; (3) The program for graduate nurses leading to the Degree of Bachelor of Science in Nursing Education.

On April 14, 1937, pursuant to public advertisement, the Board received sealed proposals for the foundation work on the main hospital building, and for the installation of elevators for the main hospital and auxiliary buildings. The lowest bid for the foundation work was that of R. P. Farnsworth & Co., Inc., for \$715,380.00, and the lowest bid for the elevators was that of Otis Elevator Company for \$711,241.00.

On June 9, 1937, pursuant to public advertisement, the Board received sealed proposals for the construction of the main hospital building, and awarded the contract to George A. Fuller Company, the lowest bidder, for \$5,894,000.00.

After receipts of the bids for the foundation and superstructure of the main building, it became obvious that the funds made available through the Federal grant and the issuance of bonds would be insufficient to provide the type of hospital which the public demand required. The members of the Board were unanimously of the opinion that the plans and specifications, which had been carefully studied and reviewed by unquestionably competent medical, architectural and engineering authorities, represented only minimum requirements, with no unnecessary elaborations. These views met with the concurrence of representatives of the Public Works Administration. The progress of the work suffered delay because of the inadequacy of available funds. The Board concluded that the completion of the project would cost at least \$12,000,000.00, and it determined to use every effort to procure the additional funds required.

On June 11, 1937, the following communication was addressed to you:

"On May 10th, 1937, the Board of Administrators of the Charity Hospital of Louisiana at New Orleans released, through Mr. Orloff Henry, acting State Director Public Works Administration, a brief review of the situation which then existed with regard to the delay in completing the project for a new Charity Hospital.

"The old buildings, which have been demolished, were erected in 1832, and constituted a group of dilapidated units, which presented not only fire hazards, but which were declared by medical authorities to be unhygienic and unfit for hospital purposes. This condition, dangerous from both a fire and a sanitary standpoint, was aggravated by the fact that overcrowding existed, requiring in some instances the placing of as many as three patients in one bed. It would have been impossible under any circumstances to continue the operation of the Hospital in the old edifices. It was imperative, if Charity Hospital was to continue its operations, that a new and modern plant be provided.

"It was thought, when application was made for Federal aid, that the sum of \$8,000,000.00 might be sufficient to furnish the necessary facilities. At that time only casual estimates had been made, no bids had been obtained. Furthermore, the cost of labor and material has since then increased considerably and is rising daily.

"On April 14th, 1937, bids for the foundations for the main building were received. It then definitely appeared for the first time

that the cost of the entire construction would exceed the estimates made.

"The lowest bid received for the foundations of the main building was ----- \$ 715,380.00

"On the same day bids were received for the installation of elevators in the main building. The lowest of these bids was ----- \$ 605,086.00

"On June 9th, 1937, the Board received three bids for the erection of the superstructure of the main building, the lowest of which was ----- 5,894,000.00

"None of these bids included plumbing, heating, ventilating, refrigerating, mechanical equipment, electrical work and fixtures, equipment and furnishings, fees of Architects and Engineers, and other cost of supervision. It is estimated that these items will amount in the aggregate to at least ----- 3,287,700.00

"Thus it will appear that if the bids received and now under consideration are accepted, and if the estimates for the items not included in these bids are reasonably accurate, the total expenditure for the main building will amount to ----- 10,502,166.00

"Contracts have already been entered into for the erection of an Ambulance House and a Laundry Building, and the work on these structures is well underway. The cost for foundations, superstructure, equipment and furnishings will entail an expenditure of ----- 376,000.00

"It goes without saying that a nursing staff is essential to the operation of a hospital. Requirements of the American Hospital Association make it imperative that the nurses be housed in close proximity to the hospital. The plans for the Nurses Home have long since been completed, but bids have not yet been called for. It is estimated by the Board's experts that the erection of an adequate Nurses Home will cost approximately ----- 1,150,000.00

"In addition to the foregoing, outbuildings must be constructed for other essentials such as warehouse, shops, boilerhouse, incinerator, animal house, etc., which, together with machinery and equipment, by a conservative estimate, will entail an expense of ----- 560,000.00

"The total cost of the project will, therefore, amount to approximately ----- \$ 12,588,166.00

"It is obvious that when the Board stated that it required \$12,000,000.00 to complete the hospital as planned, its estimate of requirements was not exaggerated.

"It is not the function of this Board to raise money, and it has no facilities for doing so. It is proper that it should present to you, and through you to the proper agencies of the State, the urgency of its requirements.

"You have informed the Board that all efforts to obtain an additional grant from the Federal Government have been unavailing, and that you are powerless to provide the additional sum of approximately \$4,500,000.00, which is imperatively needed, without action by the Legislature. We hope that you will not hesitate to present to the members of the Legislature, by the means which are available to you, the exigencies of the situation, and the importance of making available, without delay, sufficient funds to complete the Charity Hospital project as planned, so that the benefit of the grant made by the Federal Government will not be lost.

"The plans as completed have been carefully considered by unquestionably competent medical, architectural and engineering authorities, including experts representing the Public Works Administration, all of whom have assured this Board that these plans provide only the minimum requirements for the present needs of the hospital, and contemplate no unnecessary or costly elaborations. Considering the many departments and services involved, no waste space is evident. It would appear to be folly to design a new structure and provide inadequate space for the ever increasing demands of preventive medicine, or to allow in such a new structure the congestion which of necessity existed in the old hospital. Specifications have been checked and only the bare essentials of a modern structure are called for. No appreciable cut in the total estimated cost can be made without exclusion of needed space or essential items of durable and economic soundness. The Board is convinced that its request for additional funds is reasonable and that it would be unwise to attempt to do with less.

"The members of this Board serve without compensation. They have no selfish interests to subserve. Their sole purpose is to provide adequate modern facilities for the continuance of the educational and humanitarian services which the Hospital has rendered to the State for more than a century. It should never be forgotten that Charity Hospital is not only an institution for the care of the indigent sick of the State, but that it has always been an educational institution. The world-wide reputation acquired by medical schools and members of the medical profession of the State is due largely, if not exclusively, to the facilities afforded by Charity Hospital for medical instruction, research and development. It is the definite view of the Board that the educational features of the Hospital are as important and as beneficial to the State as any other service which it renders, and that they should be continued and developed.

"Confronted with a situation where adequate funds are not available to carry out well-considered plans, the Board considers it its duty to call attention to the fact that unless the necessary funds are provided immediately, there is danger of losing the benefits of the grant made by the Federal Government, and that the poor and unfortunate citizens of this State, who are proper charges of the government, will be denied the character of service which medical experts have declared is essential in the modern practice of medicine and surgery. Educational features, also, will have to be diminished and medical progress in this State will necessarily be retarded. Under the circumstances, it is the plain duty of this Board to persist in its efforts and demands to obtain the means to complete this project as presently planned. Should the Board fail in its purpose, the responsibility will rest elsewhere.

"The Board requests that such action as you may deem proper be taken immediately to secure legislative consent for the procurement of the necessary funds for the completion, without further delay, of the Charity Hospital project; and it feels certain that the members of the Legislature will respond to the appeal which comes to them on behalf of their suffering fellow citizens whose only hope of relief is through the generosity of the State."

Realizing the importance of the project, and the seriousness of the situation, you gave prompt attention to the communication of the Board, and on June 18th, 1937, the Board was advised by you that by a favorable vote of the members of the House and of the Senate, additional funds to the extent of \$4,588,166.00 had been made available to complete the Charity Hospital project as planned, and without further delay.

Your Excellency and the members of the Legislature of the State are to be congratulated for prompt action, approving a continuance of the services rendered to the State by the Charity Hospital at New Orleans. The Legislature undoubtedly realized, what was well known to us, that the institution serves not only the people of New Orleans, but the unfortunate citizenry of the entire State, and that its educational work redounds to the general welfare. Statistics show that 49% of the patients treated at the Charity Hospital at New Orleans are not residents of that City, but are from other portions of the State.

Thus closes this brief review of the Board's administrative activities for the fiscal year ending June 30, 1937.

He who reads must know that the year has been full, and that its activities necessarily required the constant devotion of the members of the Board and of the hospital officers. No one name is mentioned because all have worked so assiduously and well that the telling of individual effort and accomplishment would unduly lengthen this report. The Officers, the Administrators, the Director, his Assistant, the Executive Advisor, the Medical, Surgical and Dental Staffs, the heads of Departments and of Services, and all whose duty it is to further the interest of the Charity Hospital of Louisiana at New Orleans, down to the least of its employees, have co-operated in unison to advance the work of the great institution they serve.

Respectfully submitted,

CHAS. J. RIVET,
Vice-President.

ANNUAL REPORT OF THE SUPERINTENDENT

To the Board of Administrators of
The Charity Hospital of Louisiana at
New Orleans, Louisiana.

Gentlemen:

I herewith submit the Annual Report of the Charity Hospital of Louisiana at New Orleans for the fiscal year beginning July 1, 1936 and ending June 30, 1937.

The year ending June 30, 1937 is one of the most important in the history of the Charity Hospital because it marks the realization and fulfillment of many years' dreams—a new Hospital, one of the largest and best equipped in the country.

The change in site during the past year makes comparison with previous years difficult. All of the departments have patiently and successfully borne the great inconvenience of removing and readjusting their operations in entirely new quarters. It is difficult to comprehend the innumerable details that had to be arranged in putting the Hospital into operation in order to assure safety, comfort, and efficient professional care for all patients.

The months of the reconstruction period were the most strenuous. Every effort possible was made in the interest of economy without sacrificing efficiency. Much old equipment was reconditioned where the inclination and the desire was to purchase new. But it is believed that efficiency was in no case sacrificed and, while many pieces of modern equipment would have been most desirable from the standpoint of visual effect, it is felt that from the standpoint of ability to perform work, the Hospital is as efficient as though twice the amount of money had been spent for that purpose. It is a great tribute to all who were responsible for the administrative and professional details. Too much praise and thanks cannot be given to Mr. John Diasselliss and to Dr. Rigney D'Aunoy for their unselfish contribution of time, energy and ability to this work.

We naturally have had a much crowded condition during the year, owing to the demolition of buildings necessary to make room for the new Hospital. However, we have managed to get along reasonably well, so great was the energy of our staff, so competent did the heads of our departments prove themselves, and so willing was everyone in and out of the organization to render assistance. The Hospital is very grateful for this contribution of time and services. Relief, however, is in sight.

In submitting my Annual Report of the operations of the Charity Hospital for the year ending June 30, 1937, I shall not attempt to do more than give a general summary of the more important events of the year, and likewise a brief summary of the activities of the various departments. There will be included in the yearly reports complete and detailed facts concerning departmental organization, responsibilities and activities. These reports are of intense interest, and should be read by the members of the Board of Administrators because they are too detailed and complex for quotation here.

There are many improvements and innovations already instituted and I wish to call briefly to your attention a few of the most important of these:

1. We have extended the unit system, allowing Tulane University and Louisiana State University to participate now in the accident and emergency work of the hospital. I need not dwell upon the importance of this. At present the unfortunates of the State of Louisiana who are brought to our Hospital for emergency treatment resulting from accidents are afforded the best medical and surgical care which our great State can offer.

2. A system of residencies has been established. It becomes ever increasingly important to train properly young doctors in the special fields of medical practice. This is especially so because of the recent creation of numerous qualifying boards in the medical and surgical specialties. Our Hospital has taken cognizance of this and now offers well rounded instruction in various fields of medical and surgical work by means of these residencies. Our residents are always under the supervision of the visiting physicians and surgeons attached to the Hospital and are able to offer to our patients a more qualified type of service due to their greater experience. Again, we are now able to train a much larger number than would have been possible had we continued the antiquated and obsolete system known as "house surgeons and physicians" previously in vogue in the Hospital.

3. The laundry has been entirely reorganized and a checking system instituted, thereby eliminating the tremendous loss of linen which was an ever present problem. Additionally, laundry slips have been placed on all wards and every supervisor is held responsible for the amount of soiled laundry sent out and the amount of clean laundry returned.

4. Our purchasing system has been entirely changed. All purchases over \$100.00 are made on the basis of competitive bids publicly opened in the presence of the Hospital's Assistant Director and the Chairman of the House and Finance Committees of the Board of Administrators. Already this method of purchasing has saved the Hospital considerable sums.

5. In the past, nurses and other Hospital attaches broke much equipment. We have instituted a system whereby all requisitions for replacements must be accompanied by the broken or unserviceable items. Again, this has resulted in considerable saving.

6. Our Record Room has been entirely reorganized. We have been fortunate in securing the services of a registered Record Librarian—one of the few in the South. Under her guidance, we have instituted a modern system of records, adopting the International Nomenclature.

It is, indeed, with regret that I must call attention to the methods previously used in the Record Room. Information secured from this Department and from the Statistical Department is naturally used in compiling mortality rates, patient's total hospital days, average length of patient's stay in the Hospital, and per capita cost. During my years of service on the Board of Administrators, I have had occasion, on numerous instances, to call attention to the ridiculously low mortality rate reported by our Hospital, and its inexplicably low per capita cost. Since I have assumed active management of the Hospital, I have had occasion to investigate the manner in which in the past the Record and Statistical Departments have compiled this important Hospital data, and I have been appalled by the

method used, a method which carried as persons actually in the Hospital, persons who had left, but whose charts, through neglect, had not been discharged. For instance, on January 14, 1937 the Statistical-Record Department showed 2970 patients in the Hospital, while an actual count made at my direction showed only 1753 patients. For the last few months this deplorable and unpardonable situation has been corrected, but still it has been impossible to arrive at accurate statistics for the whole of the fiscal year under report, because our new system was in operation only over the last few months. It has, therefore, become necessary to estimate the Hospital days. That actually means that the mortality rates reported, the per capita cost of the patient's average stay days are not accurate, but far more so than they have been in the past. I can assure you that the statistical reports in the future will be accurate, as a result of the system which we have instituted.

7. The antiquated forms used in the Hospital have been discarded and a new series devised and placed in use; this will insure our records being kept in a proper and acceptable manner.

8. Regulations governing the conduct of internes and residents have been promulgated and will be enforced. Much of the chaos previously existing in the Hospital was due to the fact that no definite regulations applied to its management, and the few regulations existing were not enforced.

9. Much repair has been made to the Dibert Memorial and to the Internes' Quarters; these will be detailed in other reports.

10. The ambulance service has been entirely changed. Drivers are no longer on duty for more than 8 hours. Internes assigned to ambulance duty are at all times available for such. This has resulted in calls being answered very promptly.

11. The system of admissions has been entirely changed and a modern method instituted. This has resulted in patients being admitted more expeditiously and in basic records being prepared in an accurate manner.

12. The Hospital will now operate on a modern budget system with full control of the expenses of the various departments, thereby providing a uniform method of recording income and expense, and also an accurate recording of vital performance.

13. A connecting bridge was built between the Internes' Quarters and the ambulance building. This makes the ambulance house an integral part of the Internes' Home and provides comfortable accommodation for our Senior and Junior Residents.

I am glad to report that the various departments of the institution are functioning very satisfactorily.

Again the Grim Reaper, Death, has taken its toll from our Visiting Staff. Dr. Russell E. Stone, after a short illness, died June 18, 1937. His outstanding skill as a surgeon, his great consideration of the comfort of the patients, and his genial personality will long be remembered.

It is with much regret that I call attention to the loss of the Director of the Out-Patient Department, Sister Julia, who has been missioned to China, and who has served faithfully, loyally, and efficiently for so many years.

The Charity Hospital stands as an elaborate monument to attest not only to the loyalty and unbounded faith of that noble order of Sisters of Charity, but also to their natural dignity, fine character, strict adherence to right, and devotion to the poor unfortunate sick and injured. They have won the admiration of all who are privileged to work with them.

The Visiting and Resident Staffs are worthy of our warmest thanks for their continued interest and splendid cooperation.

Again the ladies of the Needlework Guild, under the able Chairmanship of Mrs. C. Warren Gilmer, took a very important part in furnishing thousands of surgical dressings for which we are grateful, not only for their cooperation, but also for the extraordinary zeal and generosity shown during the year in carrying on this humanitarian service.

We wish to express to Dr. Roy W. Wright, the Assistant Director, Dr. Rigney D'Aunoy, Executive Adviser, and to the Visiting and House Staffs, the Medical Adviser, Nursing, Executive, and Record Committees, and to all Heads of Departments, Nurses, Internes, Social Workers, and faithful employees our sincere appreciation of their unselfish devotion to the interest of the Hospital.

The past year has been exceedingly interesting and pleasant. An unusual spirit of friendliness and cooperation has prevailed in the Hospital family.

Grateful acknowledgment is recorded for the careful and diligent attention which has been devoted to our problems by Governor Richard W. Leche and the Legislature.

It is a sincere pleasure to express appreciation of the loyal support and whole-hearted cooperation which the Director has received from the members of the Board of Administrators.

Respectfully submitted,

GEO. S. BEL, M.D.,
Director.

FRED W. MATTHEWS,
Secretary-Treasurer.

OFFICE OF
SUPERVISOR OF PUBLIC FUNDS
STATE OF LOUISIANA
BATON ROUGE

October 13, 1937.

To the President and Members,
Board of Administrators,
Charity Hospital of Louisiana,
New Orleans, Louisiana.

Gentlemen:

An examination has been made of the accounts of the Charity Hospital as kept by Mr. Fred W. Matthews, Secretary-Treasurer, for the annual period ended June 30, 1937. The records were found in good order.

The following is a summary of the combined cash receipts and disbursements of the General, Special, Miltenberger, Insurance, Bond & Grant, New Hospital, Contingent, and Bond Liquidation Funds for the period under review:

Balance July 1, 1936.....	\$ 28,646.04
Receipts during year.....	8,538,605.66
<hr/>	
Total Balance and Receipts.....	8,567,251.70
Disbursements during year.....	3,372,896.22
<hr/>	
Balance June 30, 1937.....	\$ 5,194,355.48
	<hr/> <hr/>

All cash balances as well as securities held in trust by the various funds were verified with the statements of the fiscal agents and trustees of the Board.

Yours very truly,

(Signed) W. A. COOPER,
Supervisor of Public Funds.

CHRISTMAS TREE FUND

We are indebted to the following for donations to the Christmas Tree Fund:

Dennis Sheen Transfer Company
 Jahncke Service
 Taylor-Seidenbach, Incorporated
 American Heating and Plumbing Company
 Hart-Enterprise Electric Company
 H. T. Steffe Insulation Material
 Edward P. Phillips Electrical Contractors
 Otis Elevator Company
 John L. Diasselliss
 Andrew D. Ramelli

These donations enabled us to provide toys and candy for the children at Christmas, and, also, clothing and shoes. The clothing and shoes purchased have been used for destitute children who are our patients throughout the year.

DONATIONS TO MILLIKEN

July 12, 1937

Dr. George S. Bel, Director, and the Board of
Administrators of Charity Hospital,
New Orleans, La.

Dear Sirs:

During the past year, the work of the Electrocardiographic Department has gone forward, and further improvements have been introduced. In addition to the three standard leads of the electrocardiogram, chest leads have been made available for those patients in whom this procedure is indicated.

As an outgrowth of our experience and observations during the years since 1931, the undersigned, in collaboration with Dr. Edgar Hull, has published a book on electrocardiography (Macmillan, 1937). Other studies have been and are being carried on which will contribute to the efficiency of the department as an aid in the diagnosis of heart disease.

In conclusion, my thanks are due to the Director of the Hospital and to the Board of Administrators for their cooperation, and to Drs. Hull, Gouaux, and Decherd for their invaluable assistance.

Respectfully submitted,

DR. RICHARD ASHMAN,
Director

MARION B. STEWART
MARY PEAVY
BELLE SOLTZ
MARY BACHARACH (*)

Graduate Nurses:

CLARA STOLP
PEARL SIMON
BETTY STOUGH

Clerks:

FRED TALBOT
FREDERICK DAMPIERE

(*) Returned to department July 1, 1937. Year's leave of absence granted for post-graduate course in Physical Therapy.

To the Board of Administrators and Doctor Geo. S. Bel,
Director, Charity Hospital, New Orleans, La.

Gentlemen:

We submit herewith the annual report of the Physical Therapy Department from July 1, 1936 to June 30, 1937:

PERSONNEL:

Referring to the personnel of the department, as outlined above, all graduate technicians are graduates of Physical Education or graduate nurses, with an additional year of post-graduate work in Physical Therapy. They are supervisors, each in charge of her division, such as Ultra-Violet, Diathermy, etc. They are responsible for treatments, care of apparatus and teaching student nurses. Each of these graduate technicians is rotated or transferred to other divisions of the department at any time.

Graduate nurses are on such services as suction pressure therapy, fever therapy, and on relief duty in other sections.

DEPARTMENT DIVISIONS:

- | | |
|-----------------------------|-----------------------|
| 1—Thermal | 5—High Frequency |
| Infra-red | Monoterminal |
| Luminous | Autocondensation |
| Diathermy | Diathermy |
| 2—Photo-chemical | 6—Electro-chemical |
| Mercury arc | Galvanism |
| Air-cooled | Ionization |
| Water-cooled | |
| 3—Mechanical | 7—Hydrotherapy |
| Massage | Whirlpool—arm and leg |
| Exercise—active and passive | Hubbard Bath |
| Muscle training | |
| Corrective exercise | |
| 4—Electro-mechanical | 8—Special |
| Faradism | Muscle and Nerve Test |
| Galvanism | Artificial Fever |
| Sinusoidal | Suction Pressure |
| | Colonic Therapy |

EDUCATIONAL ACTIVITIES:

The Physical Therapy Department gives eighteen theoretical lectures to the student nurses. They are also allowed one month's practical service in the department, serving a limited time in each division. This enables them to become familiar with Physical Therapy as they encounter it, either in private nursing or in institutional work.

A course in Physical Therapy is given to the Junior Medical School students of the Louisiana State University. The course consists of eighteen didactic lectures and eighteen hours of practical demonstrations in the Physical Therapy Department. The purpose of this course is to interpret the functional effects to be gained from the use of the different modalities.

ACHIEVEMENTS:

As in former years, routine activities of the Physical Therapy Department have not only been carried forward, but detailed studies have been made of the importance of suction pressure therapy, especially in the treatment of peripheral vascular disease, and in artificial fever therapy, in the treatment of resistant seropositive syphilis and syphilis of the central nervous system.

This department has, in the past few years, been cooperating with Dr. J. K. Howles, of the Department of Dermatology, and has helped considerably in treating the central nervous system syphilitic cases which have accumulated over a period of years in the Out-Patient Department of Charity Hospital.

There is a group of cases unable to take intravenous therapy, especially the arsenicals, due to cardio-vascular complications, or to optic atrophy. There are other patients who have failed to respond to heavy metal and tryparsamide therapy, and who have grown progressively worse under this routine. There is still another group of patients of central nervous system, syphilitic cases who have developed an intolerance to both arsenicals and heavy metals, either in one or both of these therapeutic measures. There is still another group who have required therapy, such as

Wasserman Fast cases, which have accumulated, and which have not responded to the routine therapy. The anti-syphilitic clinic of the Out-Patient Department has referred these types of patients in increasing numbers to the Physical Therapy Department for treatment by inductotherm therapy, with most gratifying results. The response to this pyretotherapy in some cases is almost miraculous.

The Director of the Anti-Syphilitic Clinic submitted at the American Congress of Physical Therapy, which was held in New York City in September, 1936, a recent survey and report, giving the results of these cases in the Physical Therapy Department of the Charity Hospital.

As stated in last year's report, the Physical Therapy Department has installed an alternating suction-pressure vascular machine, in cooperation with the peripheral vascular disease clinic. The best results are obtained in cases presenting early signs and symptoms of impaired circulation. Cases of early gangrene, especially of the superficial type, are often cured.

The main contra-indications are: (1) Far advanced arterial obstruction, with or without gangrene; (2) Extensive gangrene; (3) Infections, such as cellulitis and lymphangitis, phlebitis, or infected gangrene, and (4) Necrosis of the bone, arthritis and neuritis.

The proper selection of cases is absolutely necessary. All cases should have a complete history and physical examination before treatment is begun, and the state of vascular damage determined. Only a limited number of cases can be treated, and a proper selection of patients will eliminate the hopeless cases and make room for those who can be helped.

DEPARTMENTAL RECORDS:

A change has been made in our record forms for poliomyelitis. This record form heretofore has been inadequate. It is a functional, and not an electrical test. Confusion is often occasioned with reference to the functional test for poliomyelitis, and the electrical test for Reaction of Degeneration by faradism and galvanism. We would like to stress the need for full data on all requests sent to this department.

LIBRARY:

We need more physical therapy technical and reference books for our department library. New research and study in this field are making such vast strides that every technician should have as much new literature as possible for reference.

RECOMMENDATIONS:

Our attention has been brought to the need for a graduate nurse, with some business training, to take over the position of admitting patients. This has become a necessity because of the large scope of medical terminology used in this department. A well equipped gymnasium, an adequate therapeutic pool for our increased number of poliomyelitis cases, and other types of orthopedic and neurological cases, a Morse Wave unit, an Ultra-Violet Solarium, and several pieces of new apparatus, to replace those that are obsolete, would be very welcome additions toward increasing the efficiency of the department.

I would also like to stress the need of adding at least three more technicians to our present staff within the next two years. I would like

to impress upon all those interested in this department that a well organized department depends upon its well trained staff, and such is my reason for looking ahead for technicians who are capable, and who have the personality for Physical Therapy.

It will be noted from the accompanying statistical chart that there has been a considerable decrease in the number of treatments and of patients in this department.

This is explained by the reorganization and necessary curtailing of space in the department while the new hospital is being built.

CONCLUSION:

In conclusion, the Physical Therapy Department expresses sincere thanks to all departments of the hospital for their cooperation, interest and support.

Respectfully Submitted,

UPTON GILES, M. D.
Medical Director.

MARION B. STEWART,
Supervisor.

REPORT OF THE ALLERGIC CLINIC ON HAY-FEVER, ASTHMA & SKIN ALLERGY

July 1st, 1937.

To the Honorable Board of Administration of the Charity Hospital,
New Orleans, Louisiana.

Gentlemen:

I beg to submit the following report of the work done in the Allergic Clinic from July 1st, 1936 to July 1st, 1937:

We gave 8,861 treatments and held 192 consultations with the various services.

The cases were distributed as follows:

		Male	Female	White	Colored
Skin Allergy.....	25%	43%	57%	75%	25%
Asthma.....	40%	63%	37%	60%	40%
Hay Fever.....	33%	56%	44%	50%	50%
Hay Fever and Asthma.....	2%				

The yearly questionnaire sent to the patients showed the following results:

	Improved	Stationary or aggravated
Asthma.....	86.8%	13.2%
Hay Fever.....	100 (claimed) 85% estimated	
Skin.....	90%	10%

In the 2% of the cases where adrenal cortex was tried, the result did not justify its continuance. The other hormones were not applied for treatment but only for diagnostic purposes. We found in the spring cases that parathyroid produced a reaction; while the anterior pituitary reaction was most marked in fall cases and kept pace with the ragweed reaction.

We have made interesting observations on the role of the Platelet in allergy in the majority of instances the count fell during a severe spell and rose in the interval. A large supply of Cevitamic Acid furnished by Abbott Laboratories was given orally to ascertain its effect on thrombocytopenia especially in cases of purpura. The cases were markedly improved. A more complete and exact report is soon to be published on this head.

As a further help to exact diagnosis, the allergic reactions are measured in the Clinic under mercury-neon light from a portable apparatus which was assembled for class demonstrations. Those interested may consult the L. S. U. Faculty Club report for further details.

Respectfully submitted,

NARCISSE F. THIBERGE, M. D. Chief of Clinic.
LOUIS A. CABOCHE, M. D. Asst. Visiting Physician.

ANNUAL REPORT STATISTICAL DEPARTMENT

July 9, 1937

Dr. George S. Bel, Medical Director
and Honorable Board of Administrators,
of Charity Hospital of Louisiana,
New Orleans.

Gentlemen:

I submit herewith statements of exhibit of the Statistical Department for the fiscal year July 1, 1936 to June 30, 1937 as follows:

Monthly Admissions—White and Colored
Nativity of Patients Admitted
Occupation of Patients Admitted
Annual Report, Hospital Days, Daily Average of Patients, Admissions,
Discharges, Deaths, Births, Coroner's Cases.
Deaths within 36 Hours of Admission
Deaths White and Colored
Age of Patients Expired—White
Age of Patients Expired—Colored.

Respectfully Submitted,

GEO. F. ROELING, M. D.,
Statistician.

Miss Hetty Black, Clerk
Miss Gerardine Martin, Asst. Clerk

Remaining at beginning of year (fiscal)-----	3,188
Admissions-----	58,030
Remaining at end of year-----	2,309
Total Hospital Days-----	994,367
Discharged-----	55,679
Died-----	3,230
Average Gross Death Rate, per cent-----	3.7
Died within 36 Hours of Admission-----	850
Average Net Death Rate, per cent after deducting above-----	2.8
Cases reported to Coroner-----	861

REPORT

Doctor George S. Bel, Director, and the Honorable Board of Administrator of the Charity Hospital of Louisiana at New Orleans.

Gentlemen:

I wish to present the following report of the work done in our congested departments:

OPERATIONS

Operating Room	Accident Room	Cystoscopic Room
July.....1,247	July.....4,179	July.....378
August.....1,230	August.....4,152	August.....328
September...1,132	September...4,348	September...364
October.....704	October.....3,572	October.....285
November....431	November....3,110	November....205
December....453	December....3,395	December....212
January.....626	January.....3,450	January.....207
February....525	February....2,687	February....210
March.....671	March.....2,967	March.....276
April.....733	April.....3,196	April.....279
May.....688	May.....3,899	May.....292
June.....611	June.....3,843	June.....276
Total.....9,051	Total.....42,798	Total.....3,312

I wish to express sincere gratitude to the Director and to the Board of Administrators for their assistance and consideration; to the Visiting Staff and to the House Staff for their generous service and excellent cooperation; and, to the Charity Hospital Guild for their valuable and unflinching services.

Respectfully submitted,

SISTER PAULA, R. N.,
Director.

REPORT OF THE MEDICAL SOCIAL SERVICE DEPARTMENT

To the Board of Administrators and Dr. George S. Bel, Director,
The State of Louisiana Charity Hospital,
New Orleans.

Gentlemen:

I desire to present the Annual Report of the Medical Social Service Department from June 30, 1936 to July 1, 1937.

RECONSTRUCTION PERIOD

In the report for last year, a detailed account was given of the functions and types of services rendered by the Social Service Department. With minor changes in personnel, the work of the department has gone on as before. However, with the tearing down of the old hospital and the redistribution of departments and services, which cover a large area of space, many adjustments have necessarily had to be made. The Social Service Department is located at 253 South Claiborne Avenue, the clinics three and a half blocks away, the hospital record room and also some of the colored wards are nine blocks away. Naturally, a great deal of time is consumed in going back and forth to wards and clinics. We can well compare ourselves with Alice and the Queen in the Looking Glass Land where everything moves along so fast that we have to run as hard as we can to even keep in the same place. This is almost literally true. Nevertheless, the social workers have adapted themselves to the many readjustments, and the inspiration of the new hospital is ever ahead to make us forget any of the present inconveniences. And, already, a change for the better has taken place with the installation of a new system in the record room and many other excellent improvements throughout the hospital.

PARTICIPATION IN STATE AND MUNICIPAL PROGRAMS

During the past year the department has taken a very active part in inter-agency programs throughout the state. At one of the meetings of the Council of Social Agencies we participated in a panel discussion on tuberculosis with the Tuberculosis and Public Health Association of Louisiana. At another Council meeting, where several workers from other agencies gave talks on the highlights of the National Conference of Social Work at Indianapolis, a brief report was given on the meetings which pertained to medical social work.

The department has also participated in the meetings of the local chapter of the American Association of Social Workers, and one of the staff members gave a paper at the State Conference of Social Welfare which was held in New Orleans in May. The Gulf District of the American Association of Medical Social Workers, of which every worker on the staff is a member, has also been extremely active this winter in making its aims known to the other social agencies in New Orleans. The District sponsored a series of medical lectures which were designed to give the lay public some of the salient facts about medical problems. Various members of the staff are officers in the Gulf District, American Association of Medical Social Workers, the New Orleans Chapter, American Association of Social Workers, the Louisiana State Conference of Social Welfare, the Tuberculosis and Public Health Association of Louisiana and the Social Hygiene Association.

Seven members of the staff attended the National Conference of Social Work in Indianapolis. This showed real professional interest on the part of the workers in their jobs, inasmuch as only one person had her expenses paid.

The hospital sent one of the social workers to Chicago for an observation period of two weeks, during which time she visited Michael Reese Clinics, University of Chicago Clinics, and Cook County Hospital.

As a department, we cooperated with the American Red Cross by sending one of our workers to assist with flood relief work for a month in Louisville, Kentucky.

Through the Committee on Transients in the Council of Social Agencies, a census was kept for January and February of this year in order to determine the Transient Problem in New Orleans. Each agency in the city was asked to participate in this census. The following figures show the count of the transients known to Charity Hospital Social Service Department in four days during this period:

Transients	
First day -----	64
Second day -----	36
Third day -----	52
Fourth day -----	30
Total -----	182

STATE DEPARTMENT OF PUBLIC WELFARE

The cooperative medical program with the Works Progress Administration, which was described in last year's report, continued until April. At that time the project was taken over by the State Department of Public Welfare which has provided two social workers and a stenographer to carry on the work. Applications for Blind Pensions throughout the state also come to this unit. The certifications for work average 68 a month and, thus far, 130 summaries on Blind Pension cases have been received from the entire state. It would have been difficult for our department to have assumed this extra responsibility and the cooperation of the State Department of Public Welfare is greatly appreciated.

SOCIAL SECURITY

The State Department of Public Welfare and the local Department of Public Welfare have worked very closely with our department and with the provision for care for the aged, and to dependent children, and aid to the blind, our patients have naturally benefited greatly. However, there is a large group of cases known as the invalid group, which have suffered due to the fact that in some of the parishes the Social Security Act was interpreted to include only the three groups mentioned above. In a hospital as large as this, where one encounters all kinds and conditions of patients and their problems, one realizes that those three groups cover a very limited number. From the following illustrations, the reader can readily understand our problem in caring for these patients who do not fall under the three classifications.

Diabetic and Tuberculous Patient

Mr. Tom West is suffering from both pulmonary tuberculosis and diabetes mellitus. He was previously admitted to the Dibert Building in June, 1936 where he remained until September 30, 1936, at which time he

was discharged in a greatly improved condition. His tuberculous condition was regarded as non-infectious at that time and it was felt that he could safely be permitted to return to his family. Instructions were given concerning the observation of precautions, however, and he was advised concerning the use of insulin and a special diet for his diabetic condition after his return home. During his hospitalization, our Social Service Department was successful in securing relief for the family from the Department of Public Welfare, and at the time of his discharge from the hospital the doctor's recommendations concerning a tuberculosis regime and diabetic diet and insulin were sent to the agency. For several months, the case went along smoothly. The economic needs of the family were being met by the Department of Public Welfare and the family continued under the supervision of the Charity Hospital Clinic.

On June 18, 1937, Mr. West reported to our Social Service Office to appeal for help in having his regular budget from the Department of Public Welfare restored. He said that his family's budget had been cut in half three weeks previously, and that since that time the family had had insufficient food and he had received no insulin whatever. He was obviously in a very poor condition physically, and the social worker sent him at once to the Admitting Room. He went into a diabetic coma soon after being admitted to the hospital, and for twenty-four hours it was necessary to administer insulin to him every two hours. His diabetic condition has greatly improved at present, and the danger is regarded as past. He is, however, receiving ninety units of insulin a day. Because his diabetic condition has required so much attention since readmission to the hospital, his tuberculous condition has not been checked on other than to have a sputum test made. The sputum revealed tubercle bacilli, which shows his condition to be again infectious. He has been too ill to be sent to the X-Ray room for a chest picture.

On June 29, 1937, the patient attempted suicide by means of cutting his throat with a straight razor. Although the wound was not deep enough to cause his death, the healing will be a long, slow process because of the patient's diabetic condition. It will require several months at least to bring his condition back to where it was when he left the hospital last September. It will be useless to discharge him again unless proper care and insulin can be assured him after he leaves the hospital.

The Department of Public Welfare visitor on this case notified the Charity Hospital worker on June 30, 1937, that every effort was being made to have the family of this patient restored to its normal budget, and she was virtually sure that the reinstatement on a regular livable income would be made this week. Meanwhile, a supplementary check is being mailed to the family as an emergency measure.

Tuberculous Patients

Mr. Grant is a single white man who has been a patient in the Dibert Building with pulmonary tuberculosis on two occasions, from July 7, 1934 to July 21, 1936, and again from December 18, 1936 to April 5, 1937. When he was first discharged from the hospital on July 21, 1936, arrangements were made with the Department of Public Welfare for his care as he was not in a condition to work. He got along very well until November, 1936 when, due to the curtailment of the Department of Public Welfare relief to single men, Mr. Grant was dropped from the relief rolls. He attempted to find work at that time but was unable to secure sufficient nourishment and was soon afterwards readmitted to the Dibert.

He was discharged on April 5, 1937, again considered an arrested case, and was again cared for by the Department of Public Welfare. He managed very well on the budget which was allowed him until it was cut fifty per cent the first of June. He had to pay cash for his rent and was unable to secure credit for groceries; accordingly, he did not get enough to eat. He has called at our office repeatedly, talking of his condition and asking that the Department of Public Welfare worker be contacted regarding extra money for him. He continually "threatens" to return to the Dibert if we do not secure extra nourishment for him, as he says that he realizes that his condition is good now and he means to keep it that way even though he has to return to the hospital in order to secure food. Admission to the hospital probably would not be denied him, but it would seem a pity to give a hospital bed to a man who is as well as Mr. Grant when there are so many others for whom bed care is really necessary. Due to Mr. Grant's insistence, however, our frequent calls to the Department of Public Welfare did result in a supplementary check equal to half of his regular budget being issued to him. We have no assurance, however, that such a supplementary check will be repeated next month.

James Ford, a colored patient of twenty nine years, received hospitalization in the colored tubercular unit for over a year's period. He gained about thirty pounds while on the ward and was in excellent condition. After he left the hospital, it was impossible to obtain relief for him due to lack of funds. (James had been a Department of Public Welfare case before his admission to the hospital.) He has lost weight rapidly and it has been necessary for him to find shelter with anybody who will take him in for shelter. He has been unable to attend the clinic and to continue his pneumo-thorax treatments due to the fact that he does not have carfare. He was in a non-infectious condition when he left the hospital but, due to the fact that he has been unable to return to the clinic to have his lung collapsed, he is probably in an infectious condition at this time. The case is particularly serious in view of the fact that he is staying wherever he can get a night's lodging and, consequently, he is exposing others to the dread disease of tuberculosis and, is spreading the infection.

Eye Patient

A little colored girl of eight years has been suffering from a recurrent phlyctenular keratitis since June 1934. Her mother and father are separated. She is an only child. Her mother supports her by working on a Works Progress Administration project earning \$19.14 monthly. Fortunately, her maternal grandfather, who is a relief client, makes his home with the patient and her mother and, therefore, contributes to the living expenses. However, \$19.14 monthly is a small amount when one considers that it must be used for rent, food, clothing, carfare and incidentals. A high vitamin diet has been requested for Mercedes and the outline for one has been carefully prepared in the diet kitchen. Although Mercedes' mother is fairly intelligent and cooperative, she can not give her all that the doctors want her to have. An unmarried uncle has been persuaded to assist with the diet and the patient's condition has improved.

During the past two years Mercedes' mother has been taken off relief, put on various Works Progress Administration projects, and, at times, has been without any work or relief. During these periods, her daughter's eye sight has suffered. Her last visit to the Eye Clinic was in June 1937. Again, a diagnosis of recurrent phlyctenular keratitis was made and when Mercedes' mother was questioned, it was found that she was again temporarily out of work. If it were not for the assistance of the uncle and the very small amount of relief which her paternal grandfather is getting

(which, too, has been reduced), the family would be without anything to eat. Efforts are being made to have Mercedes' mother reinstated on the Works Progress Administration project so that our patient will again be able to get the diet which is one of the most important factors for cure.

STATISTICS

21,203 cases were referred to the Social Service Department from July 1, 1936 to June 30, 1937. 11,923 were new cases. Some of the types of problems and services rendered to the patient are shown in the following outline.

Services to Patients

Unmarried mothers.....	157
Care of chronics.....	622
Transients.....	848
Convalescent care.....	518
Institutional care.....	136
Examination of contacts.....	2,061
Child care.....	102
Miscellaneous.....	1,426

Cooperation with Social Agencies

Cases referred to social agencies.....	1,263
Cases steered for social agencies.....	10,330
Total.....	11,593

Division of New Cases

Number from Orleans Parish.....	7,185
Number from other Parishes.....	4,716
Number from out-of-State.....	22
Total.....	11,923

The number of visits, interviews, and transportation tickets issued give an idea of other phases of the work. In accordance with the Transportation Agreement, the patients were all investigated before the tickets were purchased. The number of tickets issued this year are less than last year, due to the fact that with the tearing down of the old hospital there is less bed space available.

Visits and Interviews, et cetera

Number of home visits.....	5,536
Number of agency visits.....	970
Number of contact interviews.....	30,478
Number of office interviews.....	14,350
Number of clinic interviews.....	17,825
Number of ward interviews.....	11,465
Number of letters.....	36,832
Number of telegrams sent.....	383

Transportation

Charity rate tickets purchased by patient...	2,705	\$ 4,595.17
Charity rate tickets purchased by agencies...	933	1,635.68
Charity rate tickets purchased by hospital...	14	27.54
Charity rate tickets part paid by patient...	1	.75
Charity rate tickets part paid by hospital...	2	1.68
Total.....	3,655	\$ 6,260.82

CONCLUSION

We are sincerely grateful to the Board of Administrators and to the Director of the Hospital for their unflinching cooperation. Without their support, our efforts would be futile. Doctor Bel's guidance and cooperation have enabled the department to maintain high standards. His unflinching interest is not only appreciated by our department but it also received the commendation of the American Association of Medical Social Workers. We are also indebted to the Sisters of Charity, to the Medical Staff, and to the other departments of the hospital, without whose cooperation we would work in vain. To other cooperating agencies, both city and state, we extend our gratitude.

Lastly, I wish to thank my own staff for their work with me to solve, not only the immediate problem, but to attain the ultimate goal of our department—efficient, prompt, and lasting social service to the hundreds of needy patients who knock at our door for assistance.

Respectfully submitted,

BEATRICE HODGE

Director

Medical Social Service Department.

Educational Activities

The education of the student nurse concerning normal nutrition and diet in disease is an important part of her training. The Dietary Department's courses are planned to give the student nurse some understanding

of the scientific background as well as a good useable knowledge of nutrition and diet therapy.

The following courses were taught:

1. Preliminary Nutrition—Lectures: 42 hours
2. Diet in Disease—Lectures: 30 hours

The laboratory work was omitted for the last year, as there was no room provided for it, due to the crowded condition of the hospital. This omission decidedly lessened the practicality of the courses.

REPORT OF SPECIAL DIET DEPARTMENT

Therapeutic Diets Served:

Anemia	3,834
Beri-Beri	222
Bland	182
Celiac	32
Diabetic	10,006
High Caloric	7,283
High Carbohydrate	1,006
High Protein	692
High Vitamin	6,469
Low Fat and Fat Free	1,060
Non-Residue	2,384
Obesity	157
Pellagra	2,762
Salt Poor Low Protein	14,542
Soft and Baby Soft	13,167
Sprue	141
Typhoid	2,342
Ulcer Management	4,841
Miscellaneous	1,367
Special Trays (Staff Infirmary)	4,596
Total	77,085

The large number of diseases in which diet figures importantly is notable. If the service of these diets could be carefully supervised by dietitians on the wards, undoubtedly the patient's recovery would be speeded. Also, records could be kept and research done to determine the effectiveness of certain diets.

REPORT OF INFANT FEEDING DEPARTMENT

Albumen and Cereal Water	2,030
Beta Lactose	16,344
Cow's Milk	13,524
Dextrin Maltose	488
Evaporated Milk	1,335
Lactic Acid Milk	3,190
Lactose	531
Peptonized Milk	60
Protein Milk	145
Sweetened Condensed Milk	16,557
Proprietary Preparations (Dryco, Olac, Lactogen, Similac, S.M.A.)	15,327
Total	69,531 Pints

There are now on the market many expensive proprietary preparations designed especially for infant feeding, all of them similar in that they simulate mother's milk. Many pediatricians, however, tend towards the more simple, less expensive, homemade formulas.

The importance of child nutrition cannot be overestimated. For that reason a full time Infant Feeding and Pediatric Dietitian has been added to the Dietary Staff since March. She not only has the full direction of the Formula Laboratory, but supervises the food service on the white pediatric division as well.

RECOMMENDATIONS

It is recommended that:

1. The food allowance be increased to cover the rise in prices and to provide adequate food for the patients as well as the personnel and employees. Budget No. 2 compiled in May, 1937, would provide this fund.
2. Dietitians be provided to supervise all food planning, preparation, and service to patients, personnel and employees. The established ratio of dietitians to patients is one to one hundred. Given this number of dietitians, the department can assume all of its responsibilities, run smoothly, and cooperate with other departments. These dietitians must be of high standing, so recognized by active membership in the American Dietetic Association. While organizing a department, dietitians who have had several years experience in a large hospital are decidedly more valuable. It will be possible in a new expertly equipped hospital, such as "THE NEW CHARITY", to establish a school for dietitians. This we hope to do, but only if the department is organized under the standards set by the American Dietetic Association. It is recommended that the department be authorized to organize at once, so that efficient food service will be established before the occupancy of the new hospital.

APPRECIATION

The department wishes to acknowledge a number of aids that have been given:

1. The large exhaust fan for the kitchens has been a godsend, and has made it possible for the employees to do their work properly, in rooms that even in winter were formerly unbearable. We are most grateful to Doctor Bel and to Mr. Diasselliss, who worked so zealously on this problem.
2. The facilities supplied in the temporary Main and Special Diet Kitchens occasioned by the demolition of the main building were beyond our expectation, and we are most grateful to the Board of Administrators for the assistance given at this time and, especially, for the new cold storage, without which the functioning of the department would be seriously handicapped.
3. The addition of two dietitians to the staff has made it possible for the department to assume more responsibility toward the patient, a responsibility that has been long neglected because of inadequate staffing.
4. The cooperation of the Purchasing Department in having the Dietary Department sample and select canned goods and meat, has resulted in the buying of more satisfactory goods than in previous years. The cost has not increased in proportion to the rise in prices. Also their cooperation with the Engineering Department in placing the delivery

truck at the disposal of the Dietary Department to properly service units of the hospital not on the grounds, and the prompt and efficient deliveries of goods from the warehouse and bakery, have added to the efficiency of the Dietary Department.

The Dietary Department is extremely grateful to Doctor Bel for his interest and never failing help in our difficulties. We are also grateful to the Members of the Board, House Staff, Visiting Men, Sisters, Internes, Nurses, Pharmacists, Engineering and Purchasing Departments, for their cooperation and assistance.

Respectfully submitted,

SISTER EUPHEMIA, B. S.,
Director, Dietary Department.

REPORT OF THE DIRECTOR OF NURSING DEPARTMENT

To the Board of Administrators and Doctor George S. Bel, Director,
Charity Hospital of Louisiana at New Orleans:

Gentlemen:

The annual report of the Nursing Department for the fiscal year beginning July 1, 1936 and ending June 30, 1937 is herewith respectfully presented:

REPORT OF ACTIVITIES

The nursing department has been very active during this past year, and we are happy to report that several important steps have been taken which will aid in establishing the programs of our School of Nursing on a higher educational plane. Activities have also been directed toward adaptation to changed conditions in our physical plant resulting from the destruction of the older hospital buildings and temporary arrangements for our nursing students to live outside the hospital.

Through action of the hospital board of administrators, an affiliation of our school of nursing with the Louisiana State University was requested and obtained. A new catalogue, describing this affiliation, was issued during the year. Under the new plan, it is possible for a student to enroll for a five year course in nursing which leads to a bachelor's degree from the university and the diploma of our school of nursing. Our advanced program for graduate nurses was, likewise, included in the plan. These programs, together with the three year course in nursing, and the clinical post-graduate courses, including Anesthesia, and affiliating courses, will be under the supervision of the Director of the School of Nursing, who has just returned after a leave of absence granted her to obtain the Master of Science degree in Nursing Education at the Catholic University of America, Washington, D. C. A Council of the School of Nursing was formed with representatives from the university, from the hospital, and from outside agencies. The programs, as outlined for the future, call for a larger staff and a better prepared faculty, and it is to be hoped that the budget for our department for the coming year will allow for increased expenditures made necessary by this expansion in our curriculum.

We are happy to report that the eight hour day was put into effect for all nurses during this past year. With two half days off weekly, our nurses are still working approximately fifty-one hours each week, however. A forty-four to forty-eight hour week is recommended, but it is impossible to inaugurate such a program at this time, due to the size of our nursing staff.

A noteworthy improvement of the past year of which we are justly proud is the new nursing technique which has been put into effect in the Contagious Unit. The Supervisor of this Department was granted a leave of absence to take a clinical post-graduate course in Communicable Disease Nursing at the Philadelphia Hospital for Contagious Diseases. Much credit and praise are due to her for the successful reorganization of nursing procedures in this particular unit. The system which has been instituted has occasioned much favorable comment from representatives of both the medical and nursing professions.

Our white general duty nurses were given an increase in salary in December. We gratefully acknowledge this action on the part of our Director who has always shown a keen sympathy for problems arising in

our department. We would like to call attention to the fact that the salary scale for nurses employed for general duty is still very low, however. Our colored general duty nurses are only receiving fifty dollars a month, and this does not include room. The minimum salary for white nurses employed in the same capacity is sixty-five dollars. We are faced with a very rapid turnover of nursing personnel because of these low salaries, and we are frequently unable to keep very desirable nurses on our staff since there is little prospect of promotion for them. We would unhesitatingly recommend the establishment of policies regarding salary scales and promotion for members of our nursing staff that would make it possible to stabilize our personnel in the very near future.

A staff education program for all graduate nurses was instituted and carried out successfully during the year. Ward procedure books which were begun as a staff project several years ago, were completed and placed on all the halls during the year.

Since October, 1936, our nursing students have been occupying the Bienville Hotel which is located about nineteen blocks from the hospital. This building provides comfortable and attractive living quarters for our students, but the distance separating it from the hospital has occasioned many difficulties which have not yet been satisfactorily adjusted. The problem of transporting students back and forth from the hotel to the hospital was met by the purchase of a large bus which runs on a time schedule between the two places. While commodious, this bus does not provide as much space as is needed. Serving of meals has also occasioned some difficulty. At present, we are maintaining two dining rooms, one at the hotel and one at the hospital, for the use of the students. The removal of the students to such a distance from the administrative staff of the school of nursing is not desirable, and we earnestly recommend that the nurses' residence be begun as soon as possible.

STATISTICAL REPORT

Nursing Staff

Director of the Nursing Department.....	1
Director, School of Nursing.....	1
Assistant Directors, School of Nursing.....	2

STUDENT AWARDS

The Honor Pin, which is awarded annually, was this year given to Miss Hazel Fern Kerr, who was chosen by the faculty as the most outstanding member of the graduating class.

Two scholarship funds of one hundred dollars (\$100.00) each were given to Miss Hazel Arnoult and Miss Regina Morris in recognition of their scholastic attainments.

Miss Marjorie Kent, Miss Annice Sanford, Miss Julia Marlin, and Miss Marie Thomas were awarded courses in Anesthesia.

Doctor Oscar Bethea's book, entitled "Materia Medica and Prescription Writing," which is an annual award, was given to Miss Lilian Sunderson who attained the highest average in Special Therapeutics this past year.

RECOMMENDATIONS

The recommendations of the department may be briefly summarized as follows:

- I. That the Board of Administrators authorize the School of Nursing to make an intensive survey of present conditions existing in the hospital as they relate to the educational program of the school, and of the curriculum at present carried on in the school, for the purpose of making necessary preparations to meet the needs of the new hospital and the expansion of the curriculum of the School of Nursing.
- II. That the nurses' new residence be begun as soon as possible.
- III. That the budget of the Nursing Department be increased to permit of salary scales and promotions commensurate with ability and training.
- IV. That some means be devised to disinfect the laundry of the Contagious Unit before it is sent to the general hospital laundry, thus, preventing possible infection.

APPRECIATION

We are grateful for the continued interest and cooperation of our Director, Dr. George S. Bel, who has met our problems with real sympathy and who has, on so many occasions, shown himself the understanding administrator. Gratitude is also extended to the members of the Board of Administrators who have assisted the Nursing Department in accomplishing so much during the past year.

Respectfully submitted,

SISTER STANISLAUS, R. N.

Director of the Department of Nursing

REPORT OF PHARMACIST

July 12, 1937.

Dr. Geo. S. Bel, Director,
Charity Hospital of Louisiana at New Orleans,
New Orleans, Louisiana.

Dear Dr. Bel:

REPORT OF RECORD LIBRARY

From July 1, 1936 to June 30, 1937

September 6th, 1937.

Dr. George S. Bel, Director,
Louisiana State Charity Hospital,
New Orleans, Louisiana.

Dear Dr. Bel:

Attached herewith is the report of the Record Library from July 1st, 1936 to July 1st, 1937.

For practical reasons many subdivisions of diseases have been combined. However, information as tabulated in previous reports is available in the Record Library.

We are indeed grateful to you for your cooperation and guidance.

Respectfully,

ELIZABETH B. GREENWALD,
Record Librarian.
