Women in the Mainstream

Women in the Mainstream (c. 1982-1984)

Collection, c. 1982-1986

30 linear ft.

Location: Newcomb Archives: NAC-146 - 171, NAB-041

SOURCE OF ACQUISITION:

There is some confusion as to the precise donors of material represented in this collection. While several individuals were recorded as "presenting" files (see chronology of events, March 1986), not all of these individuals apparently have material represented in this collection. Also, within the original file is a note recording the removal of several boxes of material from this collection, which at that time was in storage at the Newcomb College Center for Research on Women. It is not noted if these items were returned. However, it is known that the bulk of this material comes from two sources: Ernestine Thurman-Swartzwelder and Dorothy Furlong-Gardner. Other sources are Linda Perret and Martha Owens.

RESTRICTIONS:

None.

ORGANIZATION & ARRANGEMENT:

The material has been arranged within individual collections.

GENERAL NOTE:

A chronology of events has been constructed in an effort to assist research and retrieval.

FINDING AIDS:

Inventory available.

ORGANIZATIONAL HISTORY:

This collection contains the papers of several individuals who worked within an organization formed for a specific goal: to produce the Women's Pavilion for the Louisiana World Exposition of 1984. The Exposition featured many pavilions constructed by several countries, focusing on special topics, etc. WITM was organized to raise funds, design, and coordinate a pavilion that focused on women's achievements in the world since 1884, the date of the women's pavilion in the last world's fair. The 1984 women's pavilion was planned to have several sections, including a celebration of specific women of achievement in the world and in Louisiana, an art exhibit, and a changing exhibit/multipurpose room. The art exhibit was expanded to be both invitational and juried exhibits, managed by another organization, Women's Caucus for Art (WCA).

The organization's final efforts were substantially reduced from their initial plans. Well documented internal quarreling within every area of the organization led to much fractioning and resentment. Ultimately, WCA withdrew all support of the art exhibit and not all the work was shown.

SCOPE & CONTENT:

Spanning the years 1970-1985, with the bulk of the material dating after 1982, this collection offers several first-hand perspectives of events. Two of the participants kept detailed journals concerning their thoughts and feelings about the organization, the other individuals involved, and specific interactions.

One of the individuals whose papers are collected here is Dorothy Furlong-Gardner, who acted as the liaison between WCA and WITM. After handling the agreement between the two groups, she then was placed on the Executive Board, and was WITM's Exhibit Committee chair. However, as time passed, Furlong-Gardner grew more upset with WITM's handling of the Art Exhibit, the lack of promised fund-raising success, and the amount of time and stress her massive job required. She requested WITM to pay her a retainer, which they apparently agreed to do,

Women in the Mainstream

but evidently did not pay. She also expressed her discontent with WITM's handling of artist's work and change of plans without consulting WCA. Ultimately, Furlong-Gardner and WCA withdrew all support of the WITM art exhibit.

Another donor of files is Ernestine Thurman-Swartzwelder, who coordinated the Women of Achievement project, which entailed many people nominating individual women throughout history for the title, reviewing biographical data, and organizing the voting. Much of the original nominating and reviewing material is here, along with some personal files. Importantly, Thurman leaves us another personal journal, her notes on the daily arguments and happenings within the WITM office.

Linda Perret and Martha Owens, donors of small quantities of files, acted as the Chair of the Committee of the Multipurpose Room for WITM. This section featured changing exhibits throughout the Exposition. However, the files contain little personal or non-duplicate material.

The importance of this collection lies in its documentation of an organization entirely of women, formed to celebrate women, and how that organization functioned. It also details the interaction between two entirely different organizations, WITM and WCA, which maintain entirely different foci and goals. Unfortunately, not all records of the production of the Women's Pavilion are here. Significantly missing are architectural details and other information concerning the final dispensation of the Women's Pavilion.

WOMEN IN THE MAINSTREAM COLLECTION

This collection contains the papers of several individuals who worked within an organization formed for a specific goal: to produce the Women's Pavilion for the Louisiana World Exposition of 1984. The Exposition featured many pavilions constructed by several countries, focusing on special topics, etc. WITM was organized to raise funds, design, and coordinate a pavilion that focused on women's achievements in the world since 1884, the date of the women's pavilion in the last world's fair. The 1984 women's pavilion was planned to have several sections, including a celebration of specific women of achievement in the world and in Louisiana, an art exhibit, and a changing exhibit/multipurpose room. The art exhibit was expanded to be both invitational and juried exhibits, managed by another organization, Women's Caucus for Art (WCA).

The organization's final efforts were substantially reduced from their initial plans. Internal quarreling within every area of the organization led to much fractioning and resentment.

Spanning the years 1970-1985, with the bulk of the material dating after 1982, this collection offers several first-hand perspectives of events. Two of the participants kept detailed journals concerning their thoughts and feelings about the organization, the other individuals involved, and specific interactions.

One of the individuals whose papers are collected here is Dorothy Furlong-Gardner, who acted as the liaison between WCA and WITM. After handling the agreement between the two groups, she then was placed on the Executive Board, and was WITM's Exhibit Committee chair. However, as time passed, Furlong-Gardner grew more upset with WITM's handling of the Art Exhibit, the lack of promised fund-raising success, and the amount of time and stress her overly massive job required. She requested WITM to pay her a retainer, which they apparently agreed to do, but evidently did not pay. She also expressed her discontent with WITM's handling of artist's work and change of plans without consulting WCA. Ultimately, Furlong-Gardner and WCA withdrew all support of the WITM art exhibit.

Another donor of files is Ernestine Thurman-Swartzwelder, who coordinated the Women of Achievement project, which entailed many people nominating individual women throughout history for the title, reviewing biographical data, and organizing the voting. Much of the original nominating and reviewing material is here, along with some personal files. Importantly, Thurman leaves us another personal journal, her notes on the daily arguments and happenings within the WITM office.

Linda Perret, a donor of a small quantity of files, acted as the Chair of the Committee of the Multipurpose Room for WITM. This section featured changing exhibits throughout the Exposition. However, the files contain little personal or non-duplicate material.

The importance of this collection lies in its documentation of an organization entirely of women, formed to celebrate women. It also details the interaction between two entirely different organizations, WITM and WCA, which maintain entirely different foci and goals.

November 26, 1990

Dear

As you may know, the Newcomb College Center for Research on Women is in the process of creating a repository which will focus on the preservation of documents pertaining to the history of women in the South. The Newcomb Archives project is funded by a grant from the prestigious National Historical Preservation of Records Commission.

While the grant only began to fund the Center's activities in this project during the spring of 1989, collection of material for the Archives began much earlier. One of the most significant collections we have gathered is the files of the organization, Women in the Mainstream (WITM). The bulk of the material we have at the Center is from Ernestine Thurman-Swartzwelder, and includes material accumulated for the assessment of the Women of Achievement of the World and Louisiana, as well as other papers. We have also collected material from Linda Perrett and Dorothy Furlong-Gardner.

Newcomb College Center for Research on Women is interested in preserving in one place as much of the original documents pertaining to this historic organization as possible. This material reflects a rare effort in the history of the world: an all-woman organization working toward a specific goal.

Of course, there are many different opinions and perspectives concerning the WITM organization and the situation that developed. We are interested in collecting material that represents all of these perspectives. Personal reflections (recorded now or at the time of the WITM project), original organizational or personal files, correspondence, notes and journals, and other records are needed. If you have any of the original records from this organization, or know where any more are, please let us know. If you would care to write or tape your views concerning the establishment of the Women's Pavilion, please let us know also.

As historian Mary Beard said in the 1930's while trying to establish the World Center for Women Archives, "No documents, no history." We would like the all views of the women involved in Women in the Mainstream to be a part of history. Please consider contributing any documents you might have.

Thank you,

Georgen Coyle
